

## Bending Instruction for Palatal Split Screws

### Attention!

**While Bending the retention arm, never stress the weld joint.** Ideally the retention arm should be bent with 2 pliers or Aderer pliers.

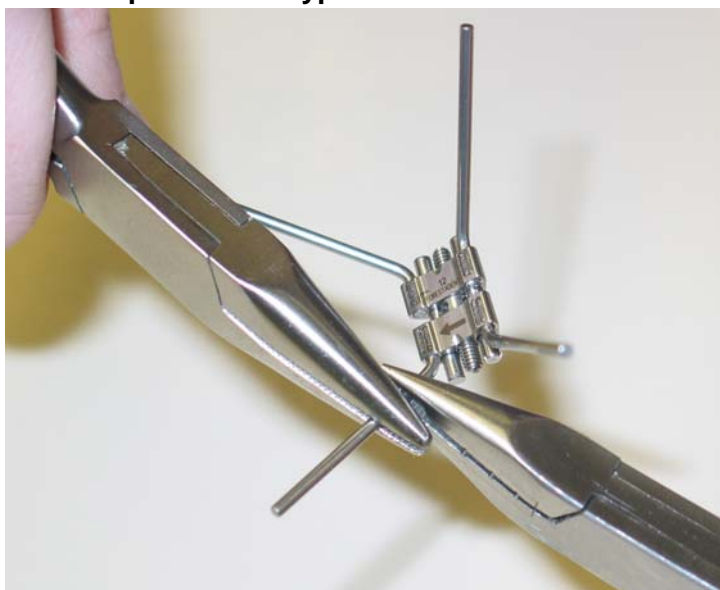

We recommend the use of the pliers special for the palatal split screw 501-0709 for the palatal split screw type S.

### Palatal Split Screws type “S”

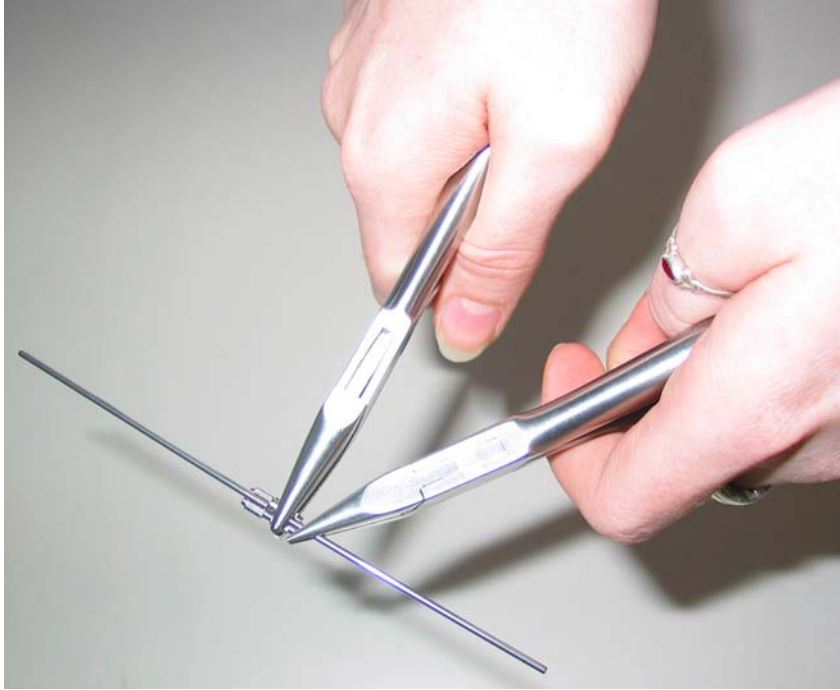

Bending with special pliers

### Palatal Split Screws type “N”

Bending with 2 pliers

## Lingual Expander

Bending with 2 pliers
